# Introduction

Greetings! I am Kartike Raj Choudhary, an imaginative explorer in the realm of data analysis. Armed with a Microsoft certification as a Power BI Data Analyst, I possess the magic to unravel hidden patterns. With Excel, Power BI, and MySQL as my trusted wands, I conjure insights that shape informed decision-making. Let's embark on a captivating journey into the enchanting world of data analysis together.

# Agenda

Data cleaning process

Questions 1 & 2

Questions 3 & 4

Conclusion

# Data Cleaning

- ✓ Removed the rows where quantity was below 1 and unit price below 0\$
- ✓ Removed the blank rows
- ✓ There were empty cells in the description column which were filled with "Not Available".
- ✓ There were empty cells in the customer ID column which were filled with 0
- ✓ There was a data type error where a cell in invoice no. had an alphabetical letter which was corrected by removing the alphabet and keeping only invoice no.
- ✓ Splitting the invoice date column into invoice date and invoice time for easier data filtering and sorting.
- ✓ Making a date table in Power BI to make it simple to organize and analyze data by date

## Revenue Trend in 2011
